

SHARPE MEDICAL CONSULTING

Healthcare + Technology: It's in our DNA

Clinical Content Packages

Clinical practice guidelines and pathways are excellent resources but are rarely integrated into an organization's EHR. Our Clinical SME's have guided Global clients through incorporating these clinical tools into their current IT systems while also delivering innovative platforms for clinical care. Whether it is strategic health care planning or clinical content management, our Experts can empower your organization.

Value within our Clinical Content Packages:

- Optimized for the Cerner System
- Validation activities performed
- Configuration of approved content in Cerner platform
- Development of training curriculum
- Interactive Train-the-Trainer course provided
- Regularly scheduled updates of clinical content
